IT CERTIFICATE

Microsoft Azure fundamentals (AZ-900)

LANGUAGES

Danish | English

PROFILE

Software developer with 2 years of experience in app development. My background in psychology has given me an understanding of human behavior, which I use to build solutions that prioritize users' needs.
I'm currently pursuing an Academy degree in IT operations, designed to fit alongside full-time work - online and with just a few evening hours.

I thrive in environments where I can dig into complex systems, find the root cause of problems, and turn messy requirements into clear solutions.
I bring a pattern-spotting mindset, analytical thinking, and curiosity to build solutions that are intuitive and human-centered.

EXPERIENCE

App & Frontend Developer *Aug 2023 - Aug 2025*
Tryg

Flutter App - Bonjour (cross-platform iOS/Android):
